Communications for shortlisted candidates

The candidates should, as soon as possible, send a valid mail address in order to activate the connection with the Microsoft TEAMS platform. For regular students of universities, it would be preferable to give the institutional mail account (e.g. xxx@studenti.unina.it for those of the Federico II University in Naples).

This information should be sent to dottorato.dma@unina.it

An access link to the platform will be provided to candidates, and they should connect at the specified date and time with a valid identity document. In case of absence they will be excluded from the selection procedure. The oral exam will last about 20 minutes and will be organized as follows:

- - a 15 minutes discussion concerning the present and/or future research activity of the candidate possibly using slides.
- - the second part of the interview, of about 5 minutes will be reserved to possible questions of the Committee.
